

Crrc wind power energy storage

Overview

At the event, CRRC unveils its integrated wind-solar-hydrogen-storage solution, seamlessly incorporating multiple energy sources, including wind, solar, hydropower, and hydrogen, to optimize energy utilization. Product Diversity: CRRC leads with diverse technologies, including high-precision wind power forecasting, energy guidance platforms, super-high towers, "one machine, one storage", cloud-edge- end collaboration PHM, digital twins for wind turbines, blade de-icing, wind-solar-energy storage coupling. The exhibit demonstrated how electricity from wind and PV sources is transferred to the urban grid via a booster station, with surplus power either stored in an energy storage system or used for hydrogen production. The system also features a DC voltage range of 1,081. CRRC also displayed the full process of energy production, storage, and application.
