

How WATT Renewable deployed solar telecom in Nigeria

Overview

First WATT Renewable Limited and MTN Nigeria have entered into a strategic renewable energy infrastructure partnership aimed at reducing diesel dependence, improving operational resilience, and expanding the use of renewable energy across critical telecommunications . First WATT Renewable Limited and MTN Nigeria have entered into a strategic renewable energy infrastructure partnership aimed at reducing diesel dependence, improving operational resilience, and expanding the use of renewable energy across critical telecommunications . First WATT Renewable Limited and MTN Nigeria have entered into a strategic renewable energy infrastructure partnership aimed at reducing diesel dependence, improving operational resilience, and expanding the use of renewable energy across critical telecommunications and electric vehicle (EV). MON JUNE 15 2026-theGBJournal| First WATT Renewable Limited and MTN Nigeria have announced a strategic renewable energy infrastructure partnership designed to reduce diesel dependence, improve operational resilience at MTN's critical facilities and supply renewable energy systems to power electric. MTN Nigeria has taken a major step towards reducing its reliance on diesel-powered operations, announcing a strategic partnership with First WATT Renewable Limited to deploy large-scale solar and battery energy systems across critical telecommunications facilities nationwide. The initiative, one of. First WATT Renewable Ltd, a subsidiary of hybrid solar energy solutions provider WATT Renewable Corp, have agreed a strategic renewable energy partnership with MTN Nigeria, part of telecommunications group MTN Group. com ('the Site') and are legally binding on you.
