

How much does it cost to replace the battery cells in the battery cabinet

Overview

EV battery replacement costs in 2025 typically range from \$5,000 to \$20,000, with significant variation based on vehicle type, battery capacity, and manufacturer. This wide range reflects the diversity in the EV market, from compact city cars to luxury long-range vehicles. How much will it cost?

Find out how much you can expect to pay for some common services directly from Apple. A shipping fee may be added if we need to. The general consensus is that replacing your Tesla battery isn't just expensive, it's brutal. Most say the job runs between \$10,000 and \$20,000. The price jump depends on which pack you're running. 5% of EVs actually require battery replacement, with 90% of those occurring under warranty coverage, making out-of-pocket costs minimal for most owners. The price difference between those two jobs can be the difference between a routine \$250 maintenance bill and a repair that. Not everyone buying a Tesla Model Y plans to own it long-term, but if you do, it's worth knowing what it'll cost you to replace the battery pack when it reaches the end of its lifespan.
