

Huijue double-glass solar module size

Overview

The 720W solar panel features advanced HJT technology and a bifacial double glass structure to deliver higher energy yield and long-term stability. With 210mm cells and a 132 half-cell configuration, this module is ideal for large-scale solar power plants and commercial energy. Version number: DAS-MP-017-A39. The right of final interpretation belongs to DAS Solar. 100% green production, transparent supply chain and excellent ESG rating in the solar industry. Increased energy yield due to optimized material use. Double glass solar modules, also known as bifacial modules, are a type of photovoltaic panel that differs from traditional solar panels in that they Solar panels that can generate electricity on both sides are called bifacial modules, and are generally in the form of double-glazing. Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the Since 2002, Huijue has been a leading manufacturer. The JA Solar JAM54D41-440/MB is a high-efficiency, all-black bifacial solar module built for residential and commercial applications where both aesthetics and performance matter.
