

Is it good to install photovoltaic on the roof of Bulgaria board

Overview

Southern and eastern Bulgaria receive the highest solar irradiation, so you can expect higher annual yields and faster payback there; roofs facing south with minimal shading and proper tilt deliver the best performance. Although there is a slight improvement, Bulgaria still remains the worst performing country in the EU when it comes to the rollout of rooftop solar PVs. Bulgaria's government outlines plans for renewable energy, yet lacks concrete strategies for rooftop solar installations despite the country's. Rooftop (as well as facade) PV installations constitute 'construction' in the meaning of Bulgarian spatial development legislation. Construction is allowed only to the following categories: the owner of the property, a person who benefits from the right to build, or a person who is entitled by law. With the entry into force of amendments to the Renewable Energy Sources Act (ZEVI), Bulgaria is taking an important step towards stimulating investments in green energy. The amendments, published in the State Gazette on June 10, aim to significantly shorten and ease the administrative procedures. In recent years, Bulgaria has witnessed a remarkable resurgence in photovoltaics (PV). After an initial boom and stagnation around 2013–2014 due to policy changes, the sector is once again growing at pace. By the end of 2023, installed solar capacity exceeded 2.9 GW, with nearly 1 GW added in 2024. EUKI project Solar Cities has transformed Bulgaria's renewable energy landscape by helping residents from the cities of Burgas and Sofia access data on solar energy potential through Solar Maps and energy offices. The solar panels of River Park serve as a supplement to the main heating.

Photovoltaics in Bulgaria: Growth, Challenges, and Ruvex's Role

Solar energy on the rise In recent years, Bulgaria has witnessed a remarkable resurgence in photovoltaics (PV). After an initial boom and stagnation around 2013–2014 due to policy changes,

Using maps and energy offices to build Solar Cities in Bulgaria

Considering the meteorological conditions in Bulgarian cities, solar power is the most promising source of renewable energy for them. Businesses in particular are capitalising on this and

CMS CEE Expert Guide to Solar Panel Installation in Bulgaria

Under Bulgarian law, an investor cannot develop and operate a rooftop PV system based on a lease agreement; the investor must secure the right to build instead.

Solar Energy Bulgaria Homeowner Guide: Proven 2026

Southern and eastern Bulgaria receive the highest solar irradiation, so you can expect higher annual yields and faster payback there; roofs facing south with minimal shading and proper tilt

Renewable energy legislation in Bulgaria

Are there any challenges related to the growth of solar PV and/or the grid capacity in Bulgaria that the legislation might still not be able to fix or

Bulgaria Rooftop Solar Country Profile

Although there is a slight improvement, Bulgaria still remains the worst performing country in the EU when it comes to the rollout of rooftop solar PVs. Bulgaria's government outlines plans for renewable

Bulgaria simplifies procedure for rooftop solar installations

The National Assembly of Bulgaria has adopted changes to the territorial planning law to simplify and speed up the installation of solar panels for the production of energy for self
