

Japanese battery energy storage production plant

Overview

SoftBank's telco arm, SoftBank Corp, said that it would build large-scale battery cells and storage systems for the Japanese market, in partnership with South Korea-based battery company Cosmos Lab and AI firm DeltaX Co. The company will produce the batteries at its factory in Sakai. On February 18, Japanese battery manufacturer GS Yuasa officially announced that its "Battery Stable Supply Assurance Plan," aimed at the development and mass production of domestically produced lithium-ion batteries for energy storage, has been officially certified by the Ministry of Economy. Japanese investment conglomerate SoftBank has launched its own standalone battery storage business in response to surging demand from the data center market. Panasonic Energy will supply its next-gen rational cylindrical automotive lithium-ion batteries for the battery electric vehicles (BEVs) Subaru plans. Tokyo and Osaka, Japan, September 6, 2024 - Subaru Corporation ("Subaru") and Panasonic Energy Co. The new facility is adjacent to an existing Panasonic plant that produces automotive batteries. Panasonic has attached the new four-storey.
