

Repair of solar photovoltaic panels

Overview

We work nationwide to bring you the best solar panel installation and repair services. Whether it's a busted inverter or your panels need bird-proofing – call us today and get a quote hassle-free! Regular servicing. Due to their very nature and requirement to have direct access to the sun, solar panels need to be placed on a suitable flat, outdoor surface that is exposed to the elements 24/7. Solar panel cleaning is extremely important too, as it keeps the panels free from any dirt or obstacles that could impede the sun's rays from reaching the PV panels and starting the process. UPS Solar operates a comprehensive maintenance programme for solar power systems anywhere in the UK, which includes a full inspection of the panels themselves, alone. An integral part of your solar panel maintenance agreement is the routine inspection that keeps your system in good working order, identifying any damage or problems and putting them right.
