

# Residents on the top floor install solar panels

## Overview

Yes, you can install solar panels and benefit from solar power if you live in a flat, whether you own or rent. However, it is a bit more complicated than it would be if you lived in a house. This is because you can't decide. Installing solar panels on flats has the potential to save you around 50% on your electricity bills, and 70% if you utilise the Smart Export Guarantee (SEG), but more on that below. If you can technically install solar panels on the wall of a block of flats, or even on the ground next to the wall. However, we usually recommend placing your solar panels on a south-facing rooftop. Rooftops on flats are too small for flats to really benefit from solar panels, also the more flats there are in a block of flats, the less roof space available to individual tenants to install. Installing solar panels on the balcony of your flat can be a quick and easy way to use solar energy. You don't need permission to install a balcony solar panel, however if you are.
