

Solar glass frosting

Overview

Often referred to as glass frosting film or window frosting film, it offers an affordable alternative to replacing existing glass with acid-etched or sandblasted panels. Whether you're looking to enhance privacy, reduce heat and glare, or create a unique design statement, our team delivers solutions that are both. We Install: Window Glass Films, Frosted, Tinted, Safety, Distraction, Solar Protection, Security Film, Custom Cut Logos, Letters, Full Color Printed Film, Vinyl Logos & Lettering In Corporate Offices, Office Buildings, Schools, Stadiums, Hospitals & More. We Travel: Manhattan, NYC, New York City. Frosted glass, whether achieved through a surface treatment or chemical etching, is a modification that physically alters the smooth surface of a window to diffuse light. This diffusion process scatters incoming light rather than allowing direct, clear transmission. Elevate your interiors with patterned glass frosting. These films are designed to make glass opaque day and night, while improving comfort in rooms exposed to.
