

# The family next door installed solar photovoltaic panels

## Overview

Solar panels to generate electricity, solar PV, are the world's leading renewable technology. They're now used to power homes, businesses and even cities. They harvest the natural power of the sun to create electricity. Firstly, the types of solar PV panel and which ones you choose, will depend on what you need them for, as well as the space you have available and the money you are willing to spend. There are many benefits to generating solar electricity, here are a few: 1. It's green: there are no pollutants. Yes, there can be some, the main one being cost. There is initially a high cost to installing them, although this has decreased a lot over the years and will continue to do so. The Smart Export Guarantee is good news if you are hoping to make your money back on your initial investment. After the government announced the changes to the FIT, new projects.
