

UK inverter prices

Overview

Solar panel inverter costs range from £500 to £2,500 for most domestic installations in 2026. Pairs with SolarEdge Home Battery for full ecosystem. The inverter is usually around 10% of the total cost of a solar system, but it has a big effect on how much electricity you actually get from your panels. 3 GivEnergy is the most installed hybrid inverter in the UK. Solar PV inverter cost varies a lot depending on the type and quality of the inverter. Other cost factors involved include the installation itself, whether power optimisers are used, and whether export. This guide provides current UK pricing, replacement timelines, brand comparisons and practical advice to help you select the most cost-effective inverter without compromising performance. Pro tip: Avoid upsells and confusing packages—choose a provider with a clear, fixed-price quote that won't change.
